Experience

Software Engineer August 2025 – Present
Microsoft *Redmond, WA*
- Developed **ADO Workbench**, a CLI and agent skills package for Platform Engineering leadership and PMs that turns natural-language intent into semester narratives and Azure DevOps items across **81 services and 8 teams**; scaled adoption by onboarding partner teams and coaching non-technical PMs on agent-based planning workflows
- Designed and shipped client-side validation for Azure Portal support tickets in sovereign clouds, preventing **1–2 weekly submission failures** that required on-call ticket replay and support engineer coordination
- Supported **17 production services** across **5 on-call rotations**, owning cross-service incidents through investigation, mitigation, and resolution using Kusto and internal telemetry

Software Engineer Intern May 2024 – July 2024
Microsoft *Redmond, WA*
- Prototyped a React/TypeScript feature for the internal Request Assistance workflow to reduce ticket misrouting and unnecessary escalations by mapping public-cloud teams to sovereign-cloud counterparts and surfacing the correct on-call engineer; presented to **335 employees**
- Launched **InternHacks 2024** alongside 10 interns — Microsoft's first hackathon created by interns, for interns

Student Trainee (Information Technology) May 2023 – August 2023
Joint Warfare Analysis Center *Dahlgren, VA*
- Fine-tuned **RoBERTa** to classify 50+ PLOVER ontology event categories from RSS feeds, scraped in Python and stored in MongoDB, then rendered as a geographic heat map of sentiment between countries in a Flask/Jinja2 web app
- Delivered the application to the data analysis department and presented to **100+ employees**

Education

West Virginia University Institute of Technology **GPA: 3.85/4.00**
Bachelor of Science in Computer Science (ABET-accredited) *May 2025 | Beckley, WV*
- Minors in Mathematics and Entrepreneurship
- Exchange Program: Royal Melbourne Institute of Technology (Semester 7)
- Awards: President's List (4 semesters), Dean's List (2 semesters), CS Outstanding Student Award, Dean of Students Outstanding Leadership Award, Benjamin A. Gilman International Scholarship, NSF SUCCESS Scholar

Leadership & Projects

Aspire AI Skills Accelerator (Microsoft) | *Lab Lead* April 2026 – June 2026
- Selected as **1 of 5 Lab Leads** for the 96-engineer Aspire AI Skills Accelerator pilot that became the model for Microsoft's AI First Engineering Bootcamp, now taught across all of Microsoft
- Rebuilt the Week 1 installation lab around Microsoft's internal Copilot CLI harness, replacing a VS Code-based workflow that required separate MCP server setup and cutting setup time from 1 hour to 15 minutes

Build Your Personal Brand with Copilot (Microsoft DevRel Studios) | *Co-Organizer* April 2026 – August 2026
- Co-organized a 10-episode YouTube series that guides students and first-time builders from PDF résumé to a live GitHub Pages portfolio, teaching agent fundamentals as they design and ship it with the GitHub Copilot app
- Coordinated 10 presenters, reviewed episodes pre-release, resolved studio demo failures, and co-presented Episode 7: Skills and Agents with Kurt Emrich and Episode 10: Copilot Remote Control with Grant Harris

Early In Career AI Builders (Microsoft) | *Co-Founder & Lead* March 2026 – Present
- Founded and grew a cross-Microsoft community of **230+ members** sharing what they build with AI
- Ran 6 hybrid sessions of member demos, workshops, and peer mentoring drawing up to **100 attendees**, with senior Microsoft leadership as guest speakers

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL
AI & Agents: Agent Skills & Plugins, Agentic CLIs, GitHub Copilot CLI & SDK, Model Context Protocol (MCP)
Technologies: Azure, Docker, Git, React, Flask, MongoDB
